

Clarify your goals, re-assess your skills, and expand your employment horizons with . . .

Landing Your First Job

A new book from AIP!

A Guide for Physics Students

Discover the wide range of technical areas open to you

In a step-by-step manner, this book will help you assess both your skills and interests. It identifies ways you can make yourself attractive to companies or institutions. The volume also contains advice on writing cover letters and resumes, interview preparation, and salary

negotiation. In addition, you'll find information on networking and employment statistics.

You know physics, we know the market

Industry thrives on the strong background in applied fields that physicists bring to their jobs. There's also great demand for those who can adapt to new challenges and exercise interpersonal skills and leadership in a complex environment. If you've been too busy with your schooling to learn about how to find your initial employment, order a copy of *Landing Your First Job* today.

YES! Please send me _____ copy(ies) of *Landing Your First Job* (ISBN: 0-7354-0080-6) at \$19.95 per copy.
